

Routing Protocols Quiz

1. Question

Sarah is a network engineer. She has been tasked with configuring OSPF in a network consisting of 4 routers and 6 subnets. What command can she use to verify the OSPF configuration?

- A) show ip route
 - B) show ip ospf neighbor
 - C) ping
 - D) show running-config
-

2. Question

John is a network administrator. He is setting up BGP on a network with multiple ISPs. What command can he use to check the status of BGP neighbors?

- A) show ip bgp summary
 - B) show ip route
 - C) debug ip bgp
 - D) show interfaces
-

3. Question

Maria is a systems engineer. She is troubleshooting EIGRP on a network with 5 routers and 10 subnets. What command can she use to verify EIGRP neighbor relationships?

- A) show ip eigrp neighbors
 - B) show ip route
 - C) show ip protocols
 - D) ping
-

4. Question

David is a network technician. He is tasked with verifying the RIP configuration on a small network with 3 routers. What command can he use to check RIP routes?

- A) show ip rip database
 - B) show ip route
 - C) show ip protocols
 - D) debug ip rip
-

5. Question

Emily is a network consultant. She is configuring OSPF on a network with 8 routers and multiple areas. What command can she use to check OSPF routes?

- A) show ip ospf database
 - B) show ip route ospf
 - C) show ip protocols
 - D) show ip ospf neighbor
-

6. Question

Michael is a network engineer. He is troubleshooting a network running EIGRP with 7 routers. What command can he use to check the EIGRP topology table?

- A) show ip eigrp topology
 - B) show ip route
 - C) show ip protocols
 - D) debug ip eigrp
-

7. Question

Sophia is a network administrator. She is tasked with verifying the configuration of a static route on a router. What command can she use to check the routing table?

- A) show ip route
 - B) show running-config
 - C) ping
 - D) traceroute
-

8. Question

James is a network technician. He is troubleshooting a network running OSPF with 5 routers. What command can he use to check the OSPF database?

- A) show ip ospf database
 - B) show ip route
 - C) show ip protocols
 - D) debug ip ospf
-

9. Question

Olivia is a network engineer. She is configuring BGP on a network with 2 ISPs. What command can she use to verify the BGP routing table?

- A) show ip bgp
 - B) show ip route
 - C) show ip protocols
 - D) debug ip bgp
-

10. Question

Liam is a network administrator. He is troubleshooting a network running RIP with 4 routers. What command can he use to check the RIP configuration?

- A) show ip protocols
 - B) show ip route
 - C) debug ip rip
 - D) show running-config
-
